(888) 714-9422

Mythic Paint is the first and only high performance paint that guarantees zero-VOCs (Volatile Organic Compounds) and zero-carcinogens. Available in 1,232 colors in both interior and exterior finishes, pastel, medium, deep and accent bases, our paints have equal or better application properties with three to seven times the durability of traditional paints. And while that may seem like a mouthful, what it really means is that they have a great product, in brilliant colors that is completely safe for you, your family and the earth that we all live on. But you don't just need to take their word for it - Mythic Paint has been independently tested and proven by one of the nation's leading paint testing facilities to outperform all other premium paint lines in the industry standardized 'scrub test'. Mythic Paint was founded by Southern Diversified Products (SDP) who spent more than six years and a ton of cash to develop the only paint on the market that is not only safe but makes your home look really good too. They launched in 2007 and are available in many independent retailers around the country.
