Decorative Tiles

Eco-Gres® Mosaic

Eco-Gres Mosaic is an unglazed porcelain mosaic which is manufactured with 90% post-industrial recycled content. This slip-resistant tile lends itself for use in wet areas, outdoors and high traffic interior applications. Tiles measure 1" x 1" back-mounted on a 12" x 12" sheet. Eco-Gres Mosaic Tile is produced by Coverings Etc. of Miami, Fla. This company specializes in tiles, slabs and countertop surfaces which possess a high degree of style as well as a high recycled content.

Advantages

- Non-toxic and mold resistant
- Heat and frost resistant
- Extremely durable
- Made from 90% post-industrial waste
- May qualify for several LEED credits

Andy Pace Introduces "Degree of Green"

Zero Emission Paint

► Mythic Paint

Mythic paint is formulated to perform like a premium line, with better scrub resistance and comparable application and touch-up properties when compared to conventional, solvent containing counterparts.

"Mythic paint offers the durability of conventional paint without the worry of harmful chemicals that can off-gas for years," said company president Rocky Prior. "We utilize a universal, zero VOC colorant system to match virtually any competitive color chip or tint to one of our beautiful 1,232 color offerings."

Low-VOC Concrete Stain

► Seal-Krete • Concrete Colors

Concrete Colors is a low VOC (under 100 g/L) semi-transparent stain designed to add decorative flair to an otherwise ordinary concrete floor. It's supplied in 5 standard colors and a low-lustre clear. By layering multiple colors on a surface, a user can simulate a variety of decorative effects.

This urethane fortified water-based acrylic formula is UV resistant, flexible, and hard-wearing, making it ideal for garage floors, driveways, pool decks, etc.
