## Mythic Paint: an Office Stylist Favorite

By: The Office Stylist

I'd like to introduce everyone to [Mythic Paint](#), a zero VOC, Zero-carcinogenic, non-toxic, low-odor, earth-friendly, people friendly and pet friendly paint. Most paints out there contain tons of toxins that you continue to breath in even years after you've painted. It's a scary thought and since we spend more time at the office than we do anywhere else, it's important that you find a non-toxic paint. It's natural that when looking through and talking with different paint vendors, we chose Mythic Paint.

Truthfully, I'm a little obsessed with Mythic Paint. I was also on the lookout for the best paints to use for client projects and I've decided to use them for any and all upcoming projects I have unless a client insists otherwise. Not to mention they have 1,232-color palette in both interior and exterior finishes. They also can mix any color from any other company or any imagination.

Here are just SOME of the purples I got to choose from:

Soft Kiss  
002-1

Lavender Frost  
002-2

Lavender Magic  
002-3

Lavender Splash  
002-4

Iris Legend  
002-5

Iris in the Wind  
002-6

Slight Nuance  
003-1

Nice Natalie  
003-2

Vanishing Violet  
003-3

Rosebury  
003-4

Plush Plum  
003-5

Purple Province  
003-6

You can choose between all sheens from flat to high gloss, ceiling paint, interior drywall primer, and a super cool interior/exterior multi-purpose primer with awesome adhesion, coverage and holdout.

Oh and they have this great [Room Visualizer tool](#) on their site:

If you're looking at giving your office or any space an update with paint, be sure to check out Mythic Paint before doing so. Keep and eye out for our next post where we'll show what color we chose for The Office Stylist Offices!
